

EXPERIMENT NO: - 01

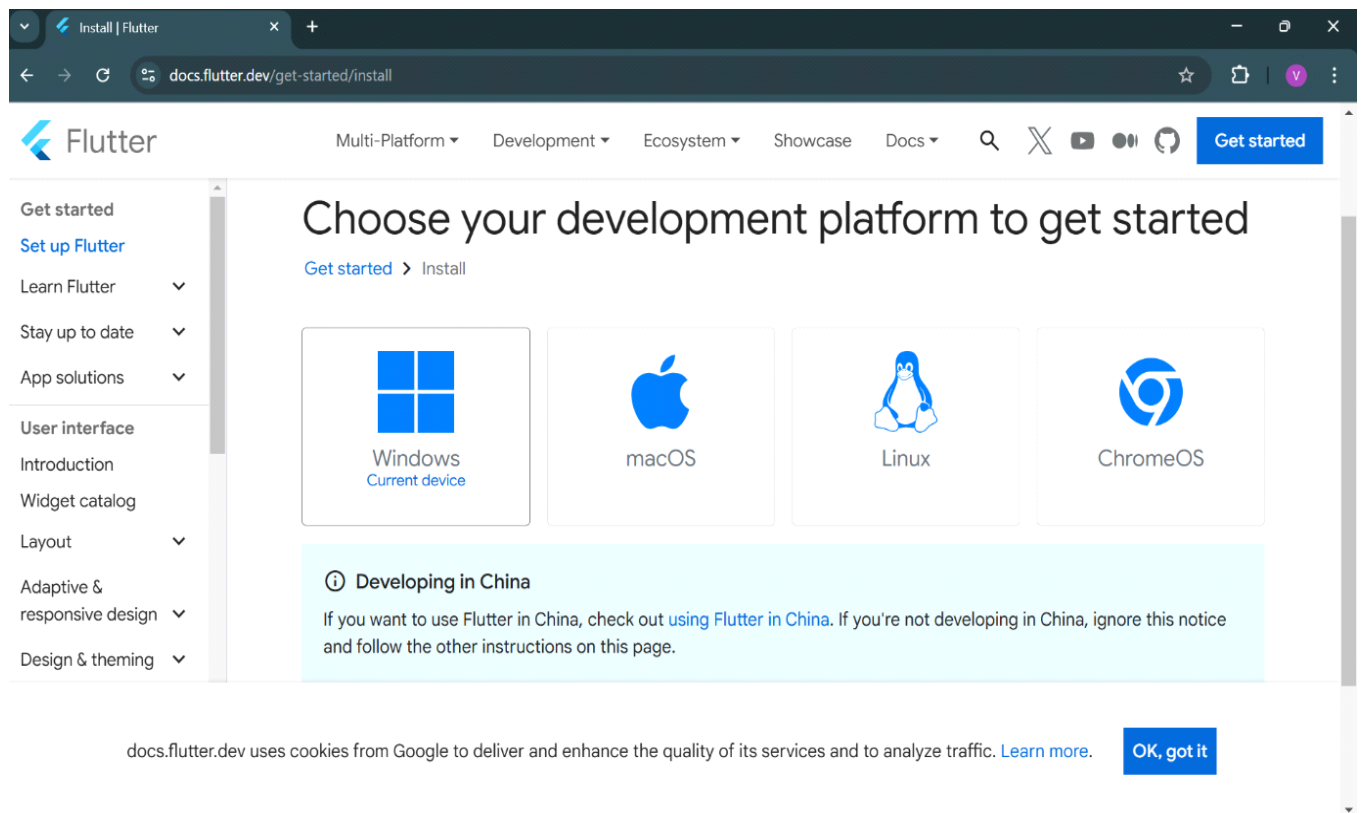

Name:- Diksha Utekar

Class:- D15A

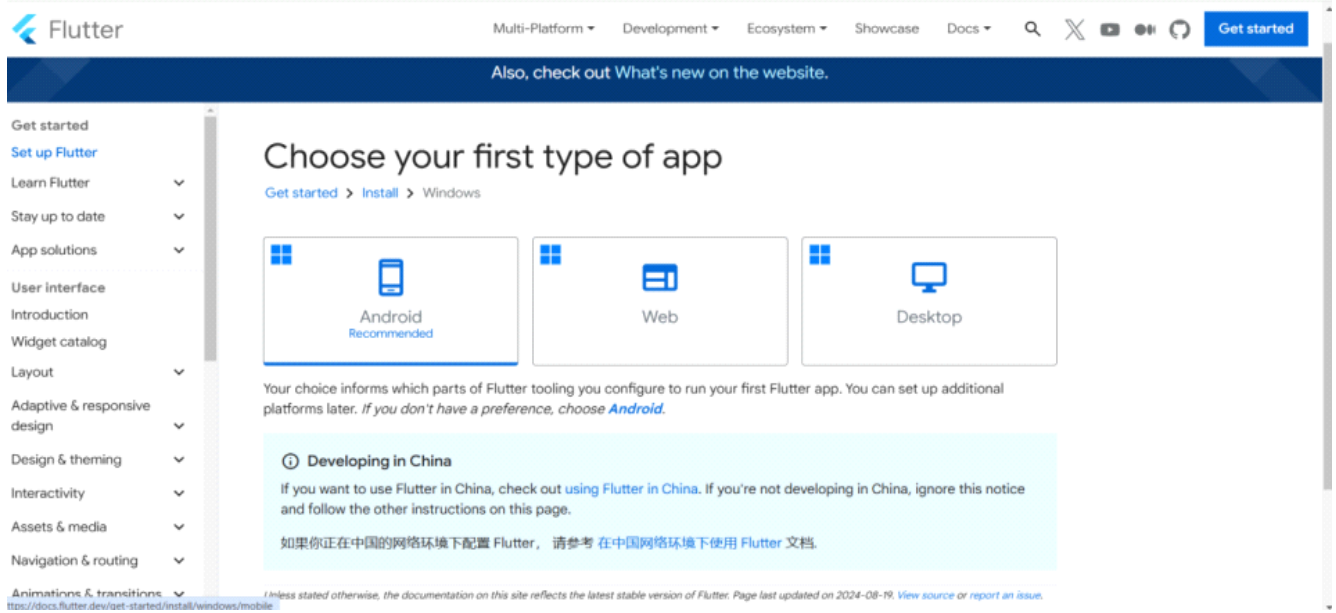

Roll:No: - 63

AIM: - Installation and Configuration of Flutter Environment.

Step 1: Go to the official Flutter website: <https://docs.flutter.dev/get-started/install>

Step 2: To download the latest Flutter SDK, click on the Windows icon > Android

Step 3: For Windows, download the stable release (a .zip file).

Step 4: Extract the ZIP file to a folder (e.g., C:\flutter)

←  Extract Compressed (Zipped) Folders

Select a Destination and Extract Files

Files will be extracted to this folder:

C:\

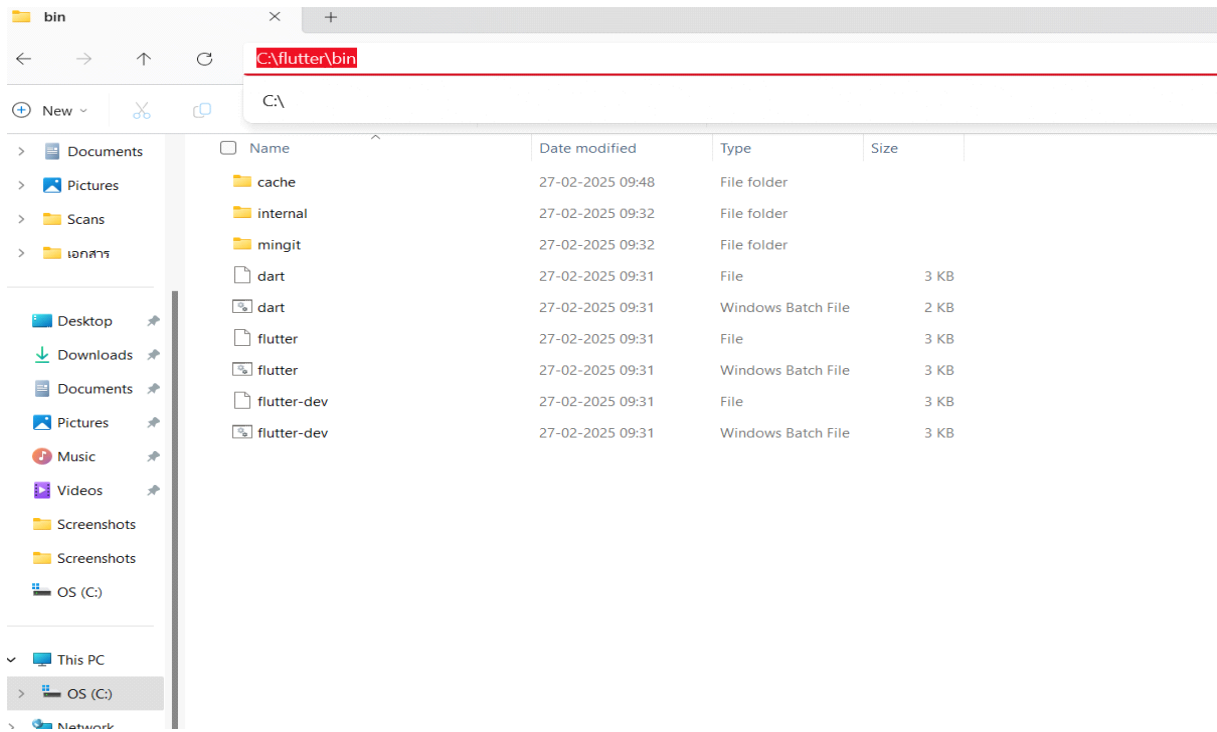

Browse...

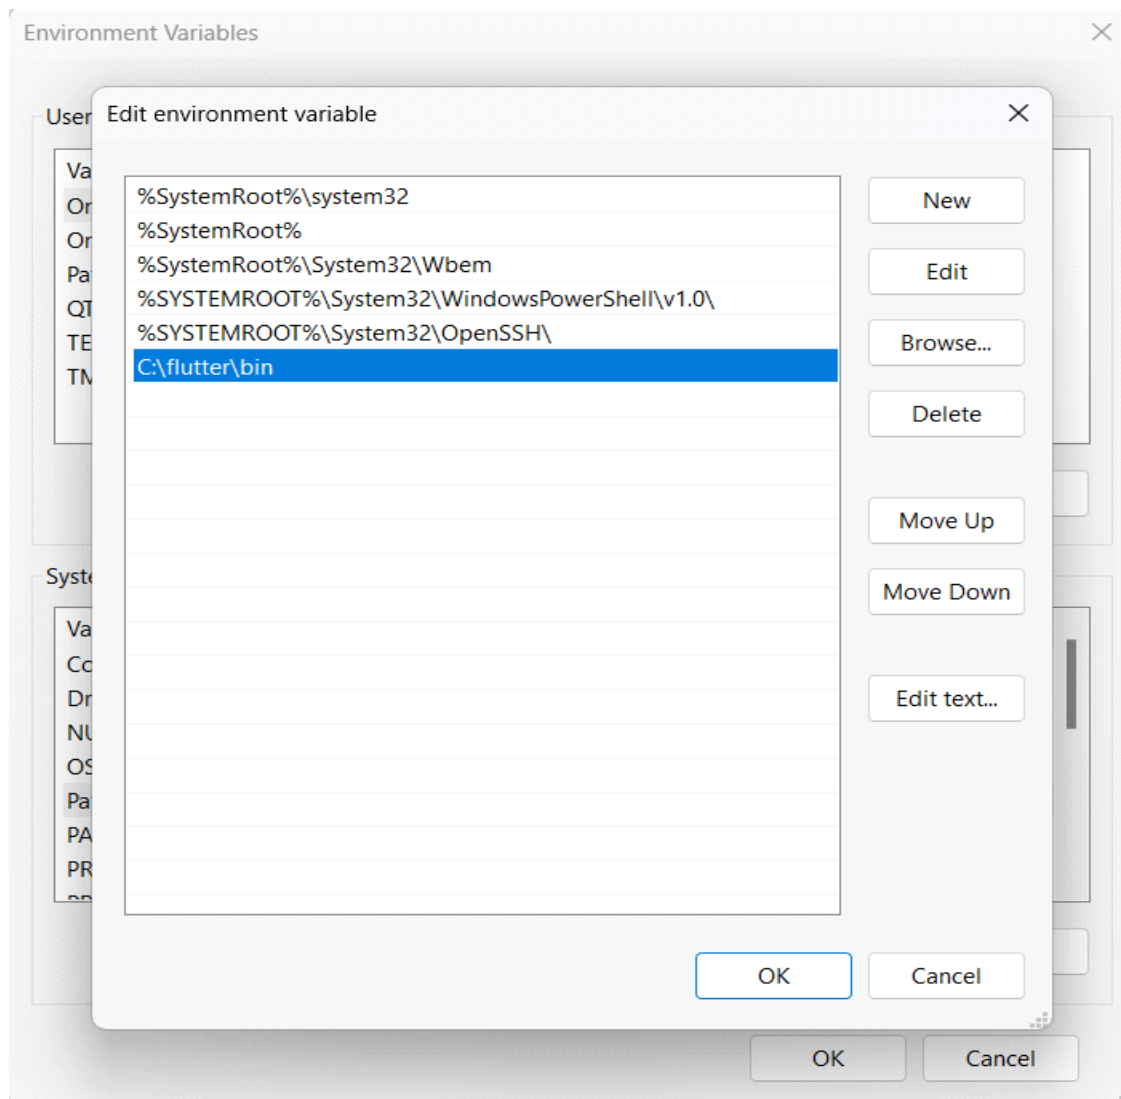

☒ Show extracted files when complete

Extract

Cancel

Step 5 :- Add Flutter to System PATH Right-click on the Start Menu > System > Advanced system settings > Environment Variables. Under System Variables, find Path and click Edit. Add the full path to the flutter/bin directory (e.g., C:\flutter\bin).

Step 6 : - Now, run the \$ flutter command in command prompt

```
Command Prompt - flutter  x  +  v  -  □  x

C:\Users\ASUS>flutter
Manage your Flutter app development.

Common commands:

flutter create <output directory>
    Create a new Flutter project in the specified directory.

flutter run [options]
    Run your Flutter application on an attached device or in an emulator.

Usage: flutter <command> [arguments]

Global options:
-h, --help                Print this usage information.
-v, --verbose             Noisy logging, including all shell commands executed.
                          If used with "--help", shows hidden options. If used with "flutter d
doctor", shows additional diagnostic information. (Use "-vv" to force verbose logging in those
cases.)
-d, --device-id           Target device id or name (prefixes allowed).
--version                 Reports the version of this tool.
--enable-analytics        Enable telemetry reporting each time a flutter or dart command runs.
--disable-analytics       Disable telemetry reporting each time a flutter or dart command runs
, until it is             re-enabled.
--suppress-analytics      Suppress analytics reporting for the current CLI invocation.

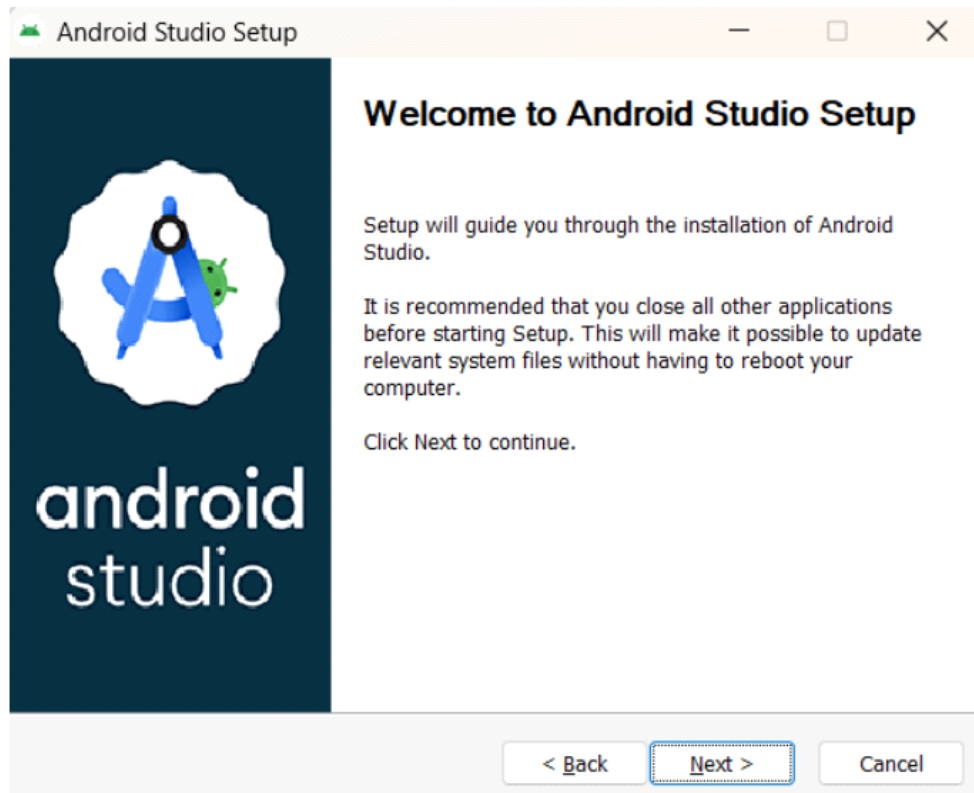

Available commands:

Flutter SDK
bash-completion  Output command line shell completion setup scripts.
channel          List or switch Flutter channels.
config           Configure Flutter settings.
doctor           Show information about the installed tooling.
downgrade        Downgrade Flutter to the last active version for the current channel.
precache         Populate the Flutter tool's cache of binary artifacts.
```

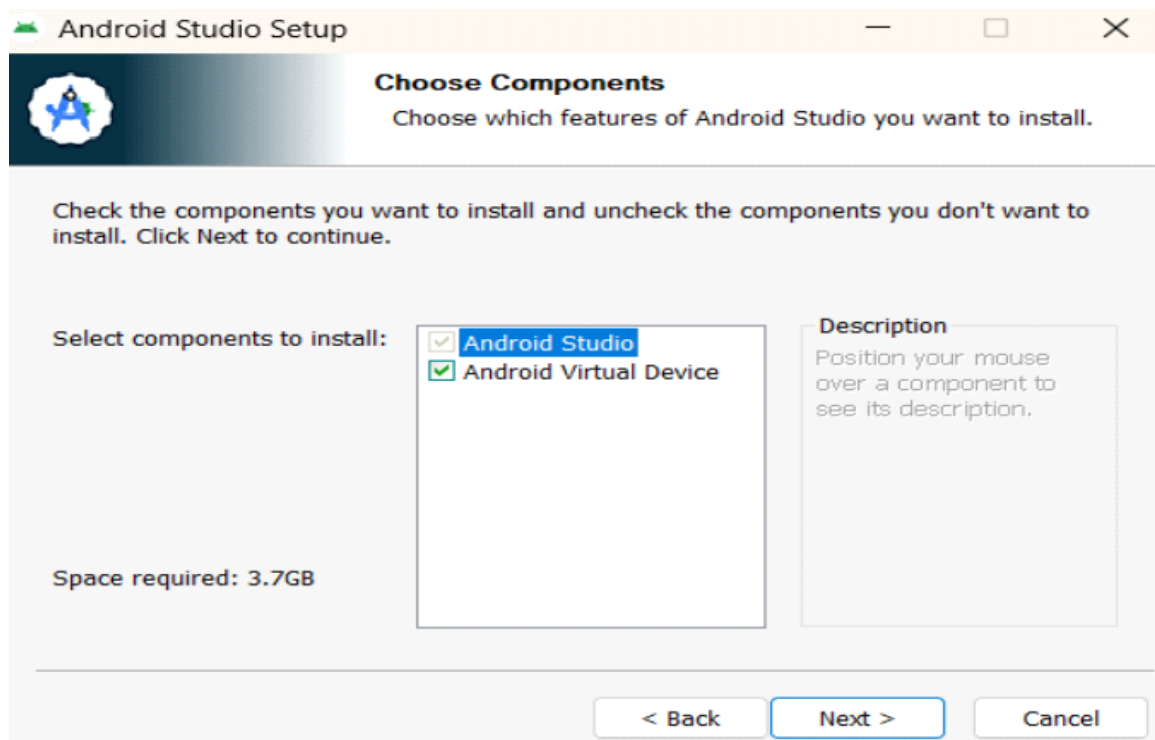

Step 7:- Run the \$ flutter doctor command. This command checks for all the requirements of Flutter app development and displays a report of the status of your Flutter installation

Step 8 : - Go to Android Studio and download the installer

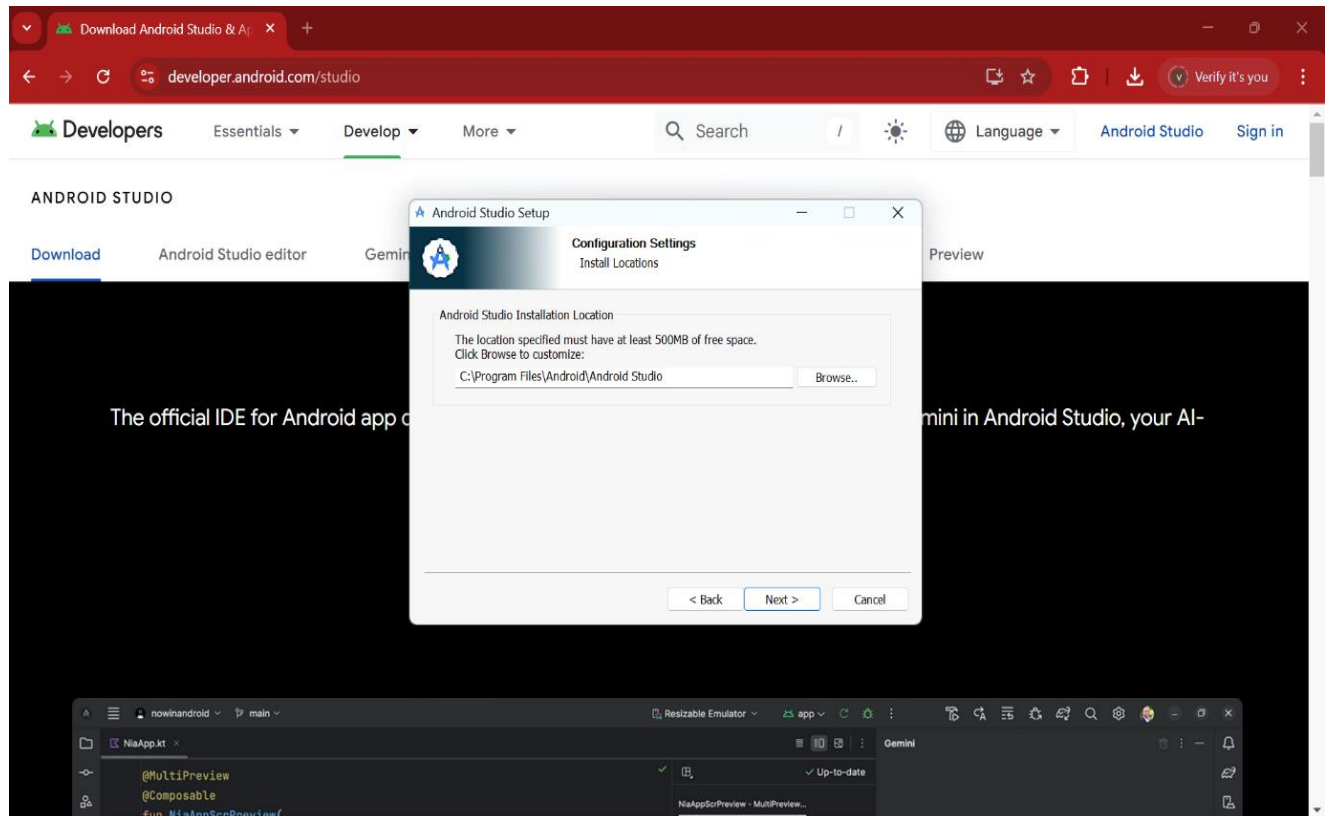

Step 8.1: - When the download is complete, open the .exe file and run it. You will get the following dialog box

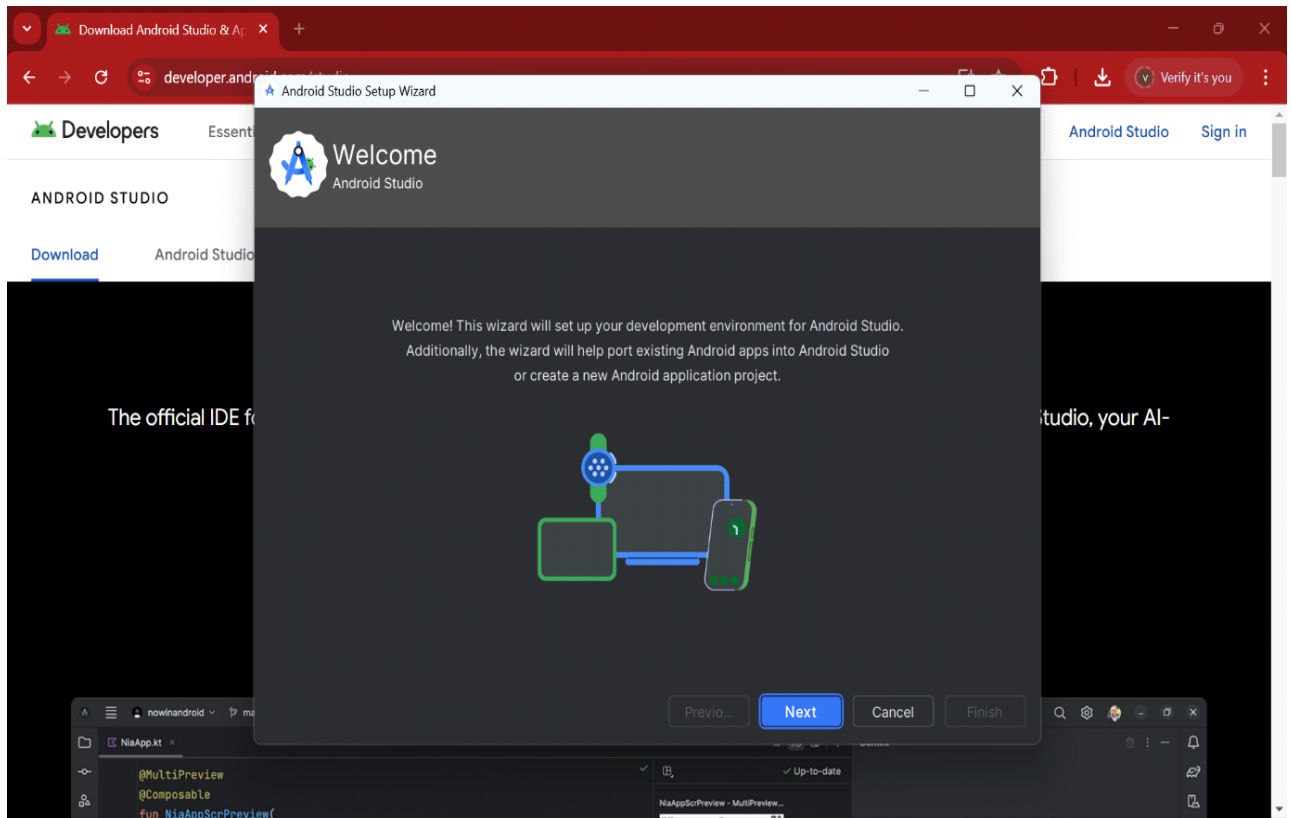

Step 8.2: - Select all the Checkboxes and Click on 'Next' Button.

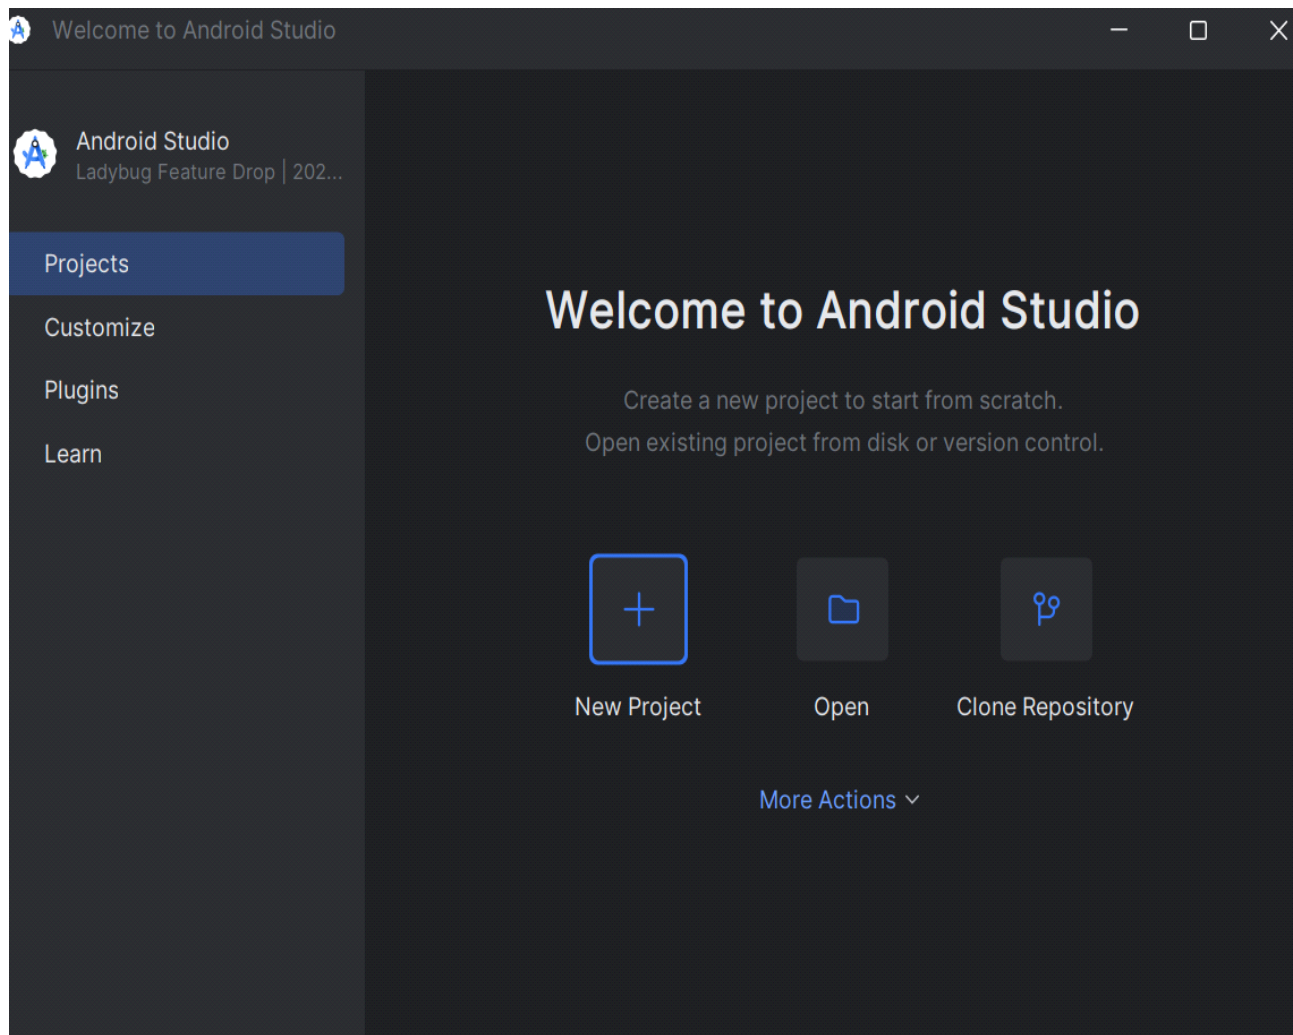

Step 8.3: - Change the destination as per your convenience and click on 'Next' Button.

Step 8.4: - Follow the steps of the installation wizard. Once the installation wizard completes, you will get the following screen.

Step 8.5: - Go to Preferences > Appearance & Behavior > System Settings > Android SDK. Select the SDK Tools tab and check Android SDK Command-line Tools and Install it.

Step 9: - Open a terminal and run the following command

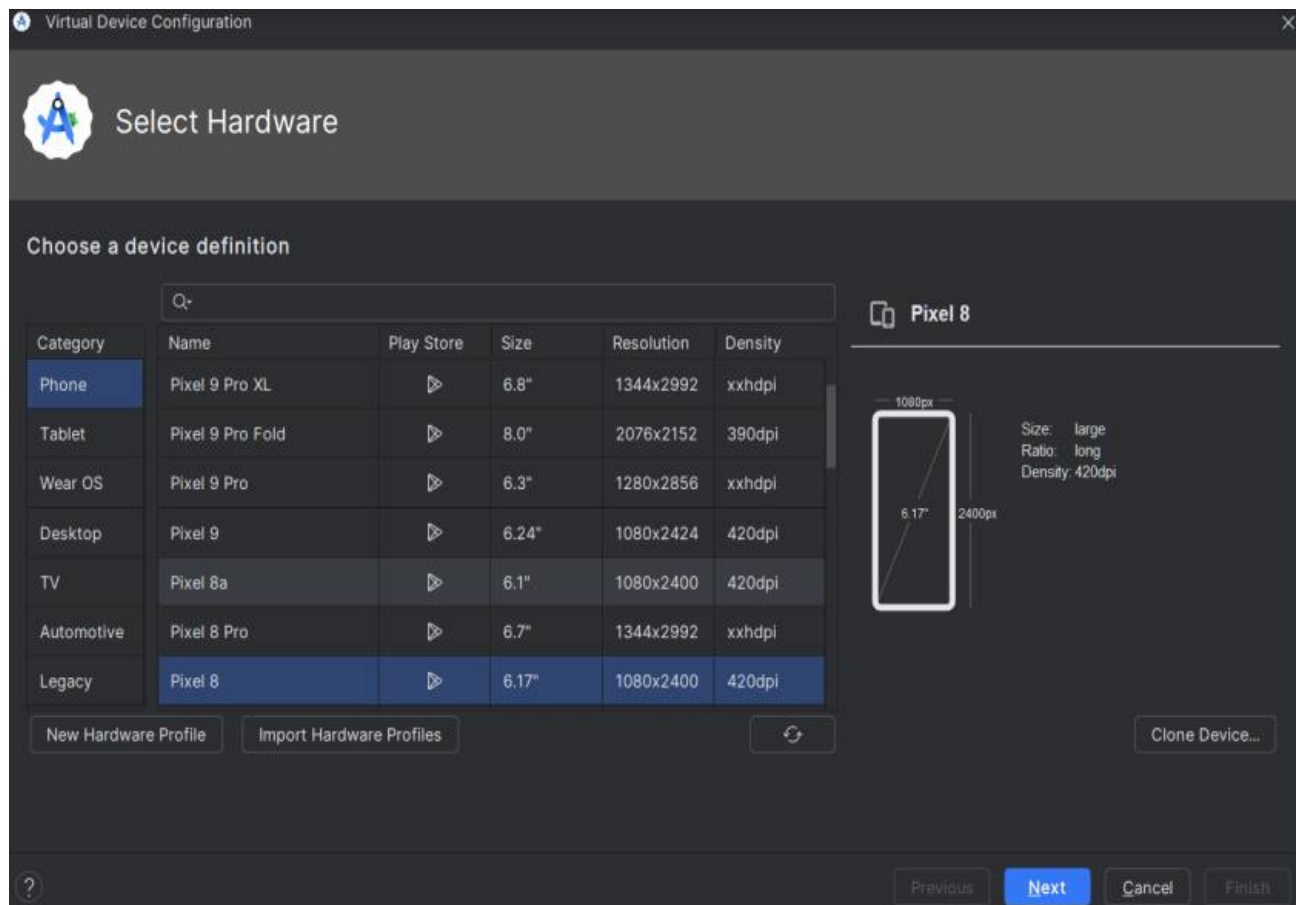

```
Windows PowerShell

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

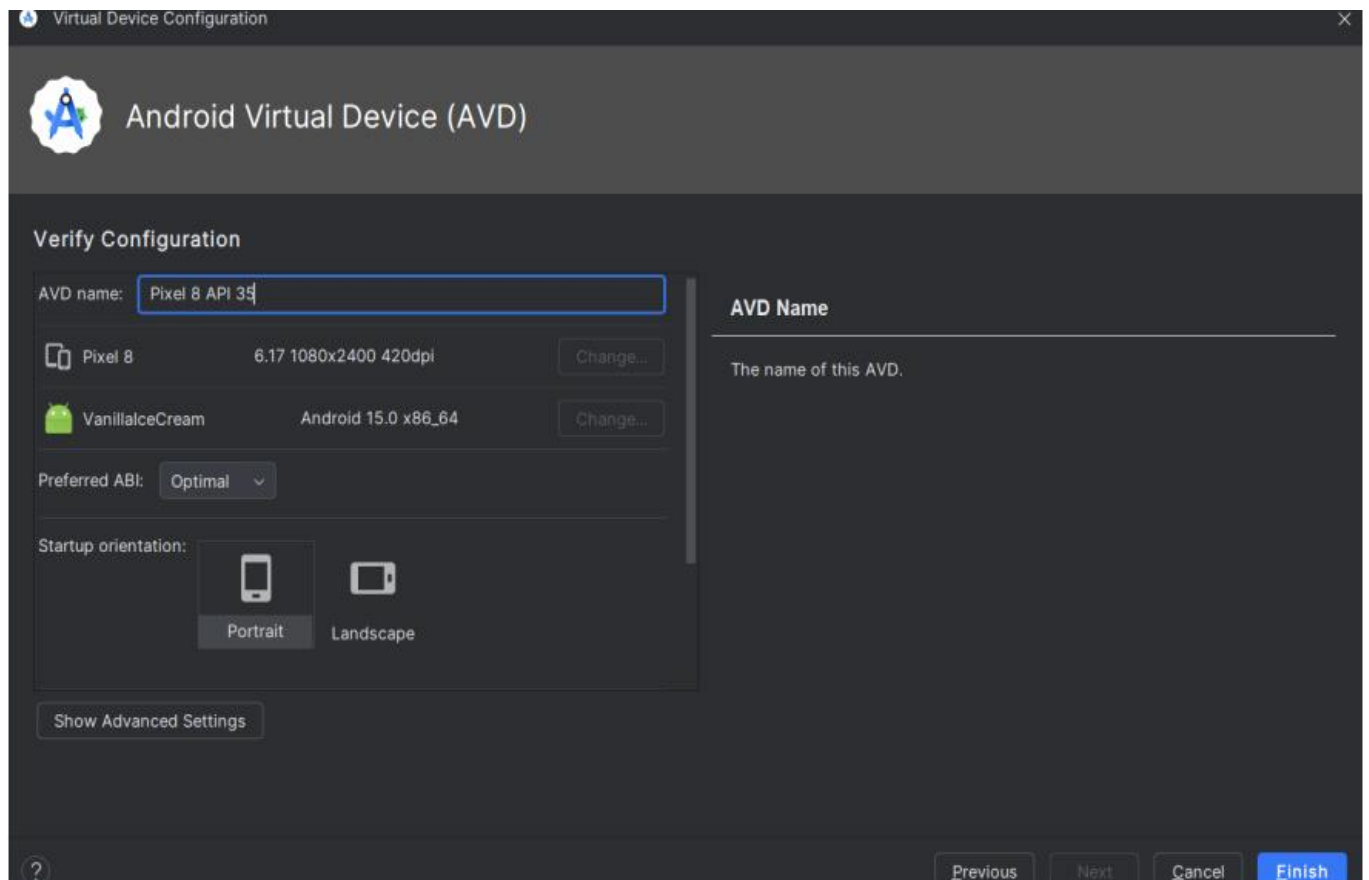

PS C:\Users\ASUS> flutter doctor
Doctor summary (to see all details, run flutter doctor -v):
[✓] Flutter (Channel stable, 3.29.0, on Microsoft Windows [Version 10.0.22631.4751], locale en-IN)
[✓] Windows Version (11 Home Single Language 64-bit, 23H2, 2009)
[!] Android toolchain - develop for Android devices (Android SDK version 35.0.1)
    ! Some Android licenses not accepted. To resolve this, run: flutter doctor --android-licenses
[✓] Chrome - develop for the web
[✗] Visual Studio - develop Windows apps
    ✗ Visual Studio not installed; this is necessary to develop Windows apps.
      Download at https://visualstudio.microsoft.com/downloads/.
      Please install the "Desktop development with C++" workload, including all of its default components
[✓] Android Studio (version 2024.2)
[✓] VS Code (version 1.84.2)
[✓] Connected device (3 available)
[✓] Network resources

! Doctor found issues in 2 categories.
PS C:\Users\ASUS> |
```

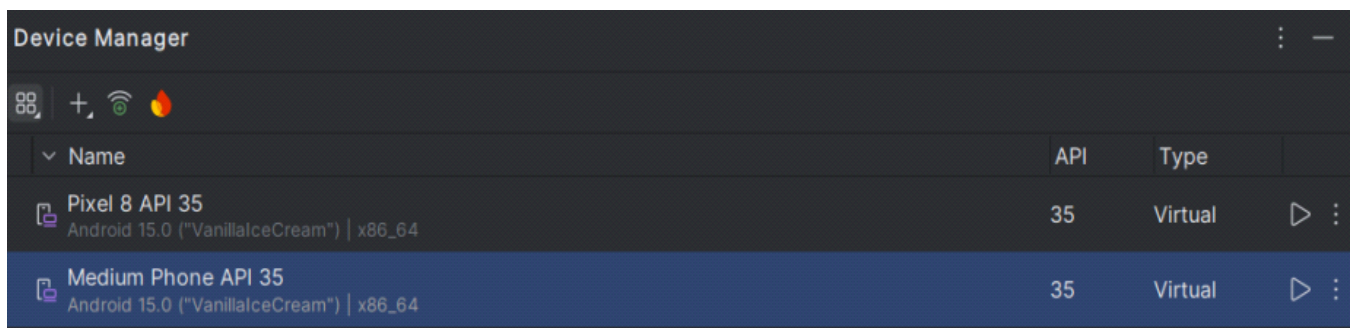

Step 10: - Next, you need to set up an Android emulator. It is responsible for running and testing the Flutter application

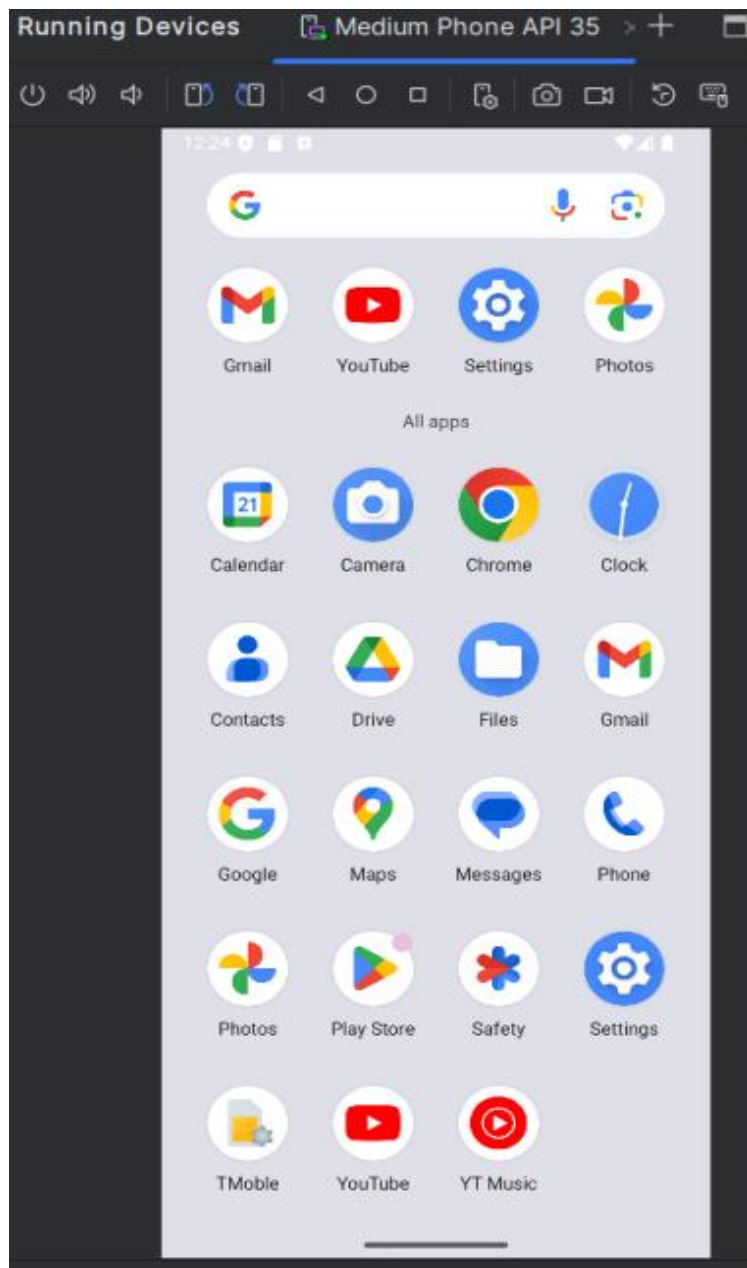

Step 10.1: - Open Android Studio and go to Tools > AVD Manager. Create a new virtual device.

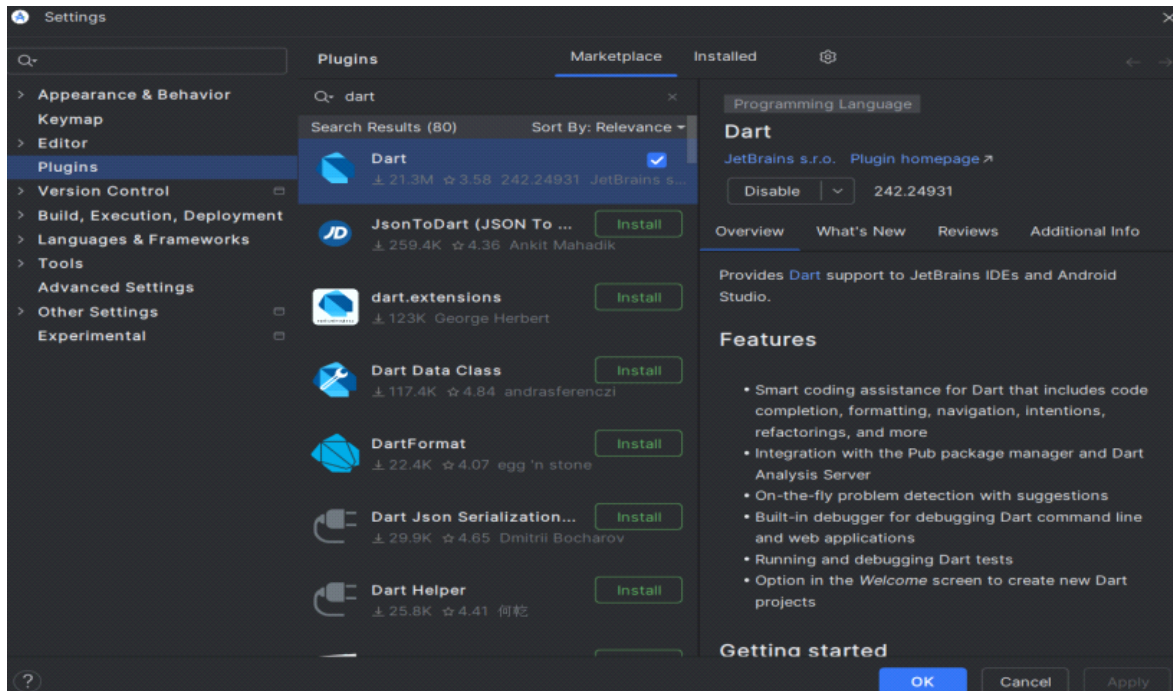

Step 10.2: - Click on the icon pointed into the red color rectangle. The Android emulator displayed as below screen

Step 11: - Now, install Flutter and Dart plugin for building Flutter application in Android Studio. These plugins provide a template to create a Flutter application, give an option to run and debug Flutter application in the Android Studio itself

Step 11.1: - Open the Android Studio and then go to File->Settings->Plugins. Now, search the Flutter plugin. If found, select Flutter plugin and click install

Step 11.2: - Restart the Android Studio

Step 12: - Go to File > New Project > Create Flutter Project, then select the project name and location, and click Next to proceed.
